A weekly update for children

Message from Mrs. Paterson, Miss Coleman, Mrs Terry, Miss Robb, Miss Cooke and Miss Nighingale to all the children learning at home

Hello Team,

We hope you are all well. What a week of storms it has been! We hope you have enjoyed watching them from the comfort of your warm homes. Our favourite part of storms are the rainbows you can sometimes see afterwards- have you seen any?

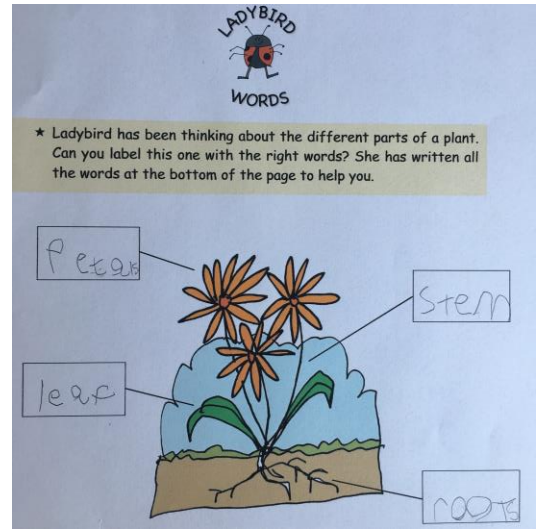

Do you remember the bible story this quote is from?

The Duchess of Cambridge has held a special school assembly on the theme of 'Spread a little kindness'. Click the link below to watch it:

<https://classroom.thenational.academy/assemblies/>

We have again been overwhelmed by the amazing work from home you have been sending in. Keep up the good work!

Today has been amazing, I was so so happy. I jumped up and put on my explorer hat and I was ready to go for tea, the most mind blowing thing happened, I made friends with a talking bunny, his had called me by jumping out of a bush. After that, he showed me around, talking. Next we saw a robot. She was selling ice-cream cones, me and my bunny wanted some. After a short break, we set off again. Following that, we saw a beautiful porcupine. Finally, we saw on a hill and watched the sunset. When we got back I sucked my new stem in and went to bed!

GIRAFLAMANTO

What is it?
A Girafamantog is a cross between a giraffe, flamingo, chicken and dog. It has the head of a giraffe, a body of a flamingo and chicken and the tail of a dog.

Where it lives -
Girafamantogs live in the southern part of Madagascar's grassy plains. It's very hot and there where they live are trees that are so thin because it's very dry and where the water from these trees comes out and goes.

What it eats -
This peculiar animal is very healthy and eats both fruits and vegetables that are from South Africa. Good as avocado because it's very soft and juicy fruit.

Hidden talents -
Girafamantogs are very famous for their extraordinary dancing. They perform at shows doing Irish dancing and Haka dancing.

Fascinating fact -
This creature has a wingspan of 4.7 meters, which is as long as a two layered house. How crazy right?
